

NEW

The next generation.

Luxous Eco

The climate screen made from recycled materials.

Together we can take the next step into contributing to a more sustainable horticultural industry, ready for next generations. With Luxous 1147 Eco FR, we are introducing a premium climate screen, partly made of recycled material. This new member of the Luxous family has the same excellent light transmission as Luxous 1147 FR, with highly effective energy saving capabilities. This makes Luxous 1147 Eco FR a sustainable solution for next generation growing and growers. Consciously growing together.
